AND

BUILD

Designsix is a team of experienced professionals with expertise in structural engineering, design, civil engineering and construction. Our team is composed of a perfect blend of both experienced and young dynamic engineers who have excelled in their areas of expertise.

We provide a comprehensive range of consultancy services, including Structural Services, MEP Services, and Infrastructure, all under one roof. We have strong BIM expertise, which enables us to provide cutting-edge solutions to our clients. Our team follows strict processes at every stage of the project, and every process begins and ends with strong documentation, sign-off, and thorough quality control measures.

Our team's exceptional project management skills ensure successful project delivery, leading to repeat business from our clients. We offer a wide range of services, including Structural, Mechanical, Electrical, Plumbing & FF, Interiors, and Build, which are all bound by absolute professionalism from start to end.

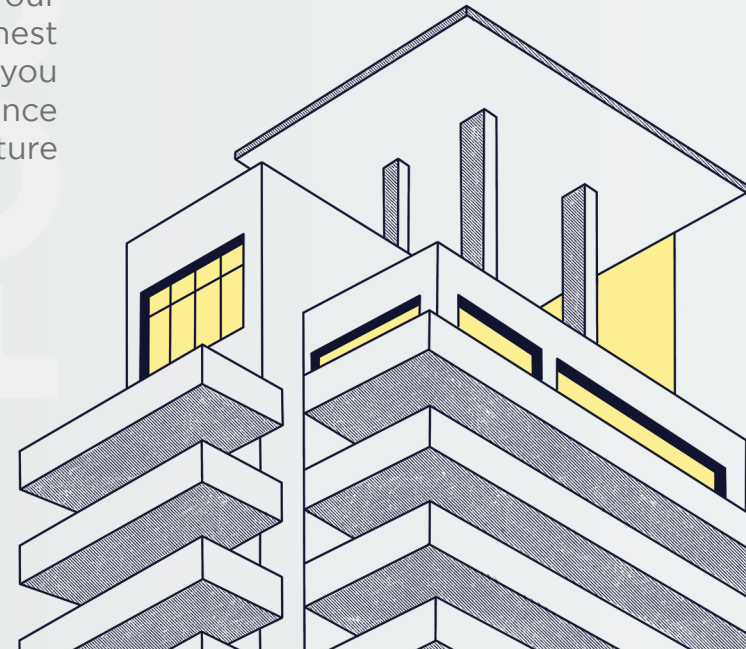

F O U N D E R

Mr. Manoharan.G

Mr. Manoharan has over 20 years of experience and is highly skilled in organizing and leading teams. He also excels as a Project Coordinator in all verticals. With extensive business experience in various domains, he has built strong connections with architects, builders, developers, and clients. He has worked on a wide range of projects, including residential, commercial hotels, hospitals, industrial, warehouse, infra, and interiors.

At Designsix, we pride ourselves on our ability to provide customized solutions that meet the unique needs of our clients. Our team is committed to providing the highest level of service, and we are confident that we can help you achieve your project goals. Whether you need assistance with a small renovation or a large-scale infrastructure project, we have the expertise to help you succeed.

VISION

VISION

Continuously improve our business practices to enhance client satisfaction while prioritizing safety, quality, service delivery, and environmentally conscious policies

S E R V I C E S

Designsix specializes in delivering comprehensive services for building construction projects throughout the country. Our range of services includes planning, site supervision, structural design, building information modelling (BIM), building physics, and project monitoring. We are committed to providing top-quality services to our clients and ensuring that every project we undertake is delivered to the highest standards.

PROJECT MANAGEMENT

Our experienced project management team is dedicated to ensuring that every project we undertake is delivered on time, within budget, and to the satisfaction of our clients. We work closely with our clients to identify their needs and requirements, develop detailed project plans, and manage all aspects of the project from start to finish.

SITE SUPERVISION

Our site supervision services are designed to ensure that construction projects are executed according to the approved plans, specifications, and quality standards. Our team of qualified engineers and inspectors closely monitor the construction process, identify and resolve issues as they arise, and ensure that the project is completed on time and within budget.

FEASIBILITY REPORT

Our feasibility report service provides clients with an objective and comprehensive analysis of the technical, financial, and commercial feasibility of a proposed project. We analyze all relevant data, including site conditions, regulatory requirements, project costs, and market demand, to help our clients make informed decisions about their investment.

STRUCTURAL & MEP DESIGN

Our structural and MEP design services cover all aspects of the building construction process, from initial concept design through to detailed design and construction documentation. Our team of experienced engineers and designers works closely with architects, builders, and contractors to deliver designs that meet the highest standards of safety, functionality, and sustainability.

PLANNING

Our planning services cover all aspects of the project development process, from initial site analysis and concept design through to detailed project planning and execution. Our team of experienced planners and designers works closely with our clients to develop plans that are tailored to their specific needs and requirements.

BIM

Building information modeling (BIM) is an innovative approach to building design and construction that allows for the creation of virtual models of buildings, which can be used to simulate and optimize various design options, improve project coordination, and reduce construction costs. Our BIM services include 3D modeling, clash detection, construction sequencing, and construction documentation.

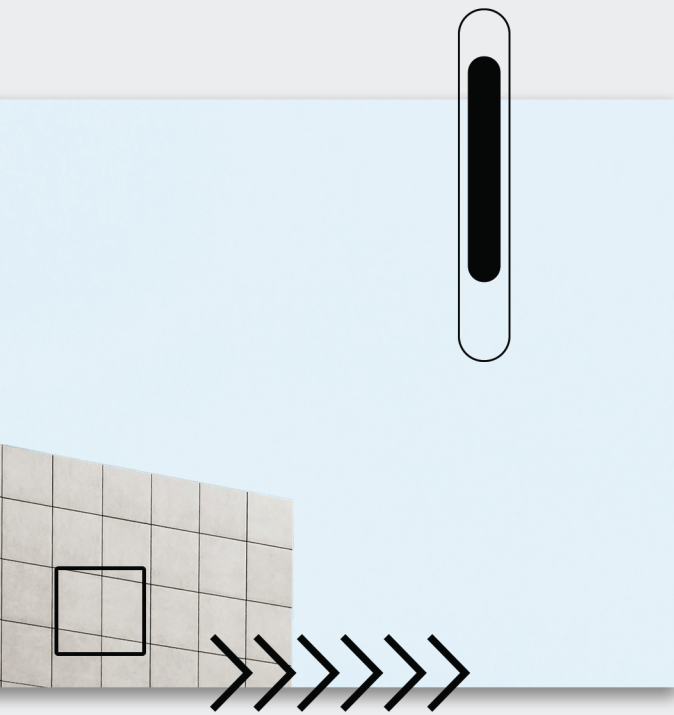

CONSULTING SERVICES

We offer a range of consulting services to support our clients in their building construction projects. Our consulting services include project feasibility analysis, site selection, project management, risk management, sustainability consulting, and more. We are committed to providing our clients with the highest level of expertise and support throughout the project lifecycle.

In addition, we also provide Engineering, Documentation, Submittals Approval, Shop drawings, Coordinating Drawings, Commissioning, and As-Built services. We comply with Consultant's Specifications, International Standards & Codes, Safety & Quality Plans, and ensure that our projects are completed on time and within budget. We also offer a comprehensive range of services, including SITC Service, Upgrade & Maintenance of Electro-Mechanical Systems & Networks, Utilities, and Equipment.

BUSINESS SEGMENTS

STRUCTURAL SERVICES

Sub structure and Super structure system.

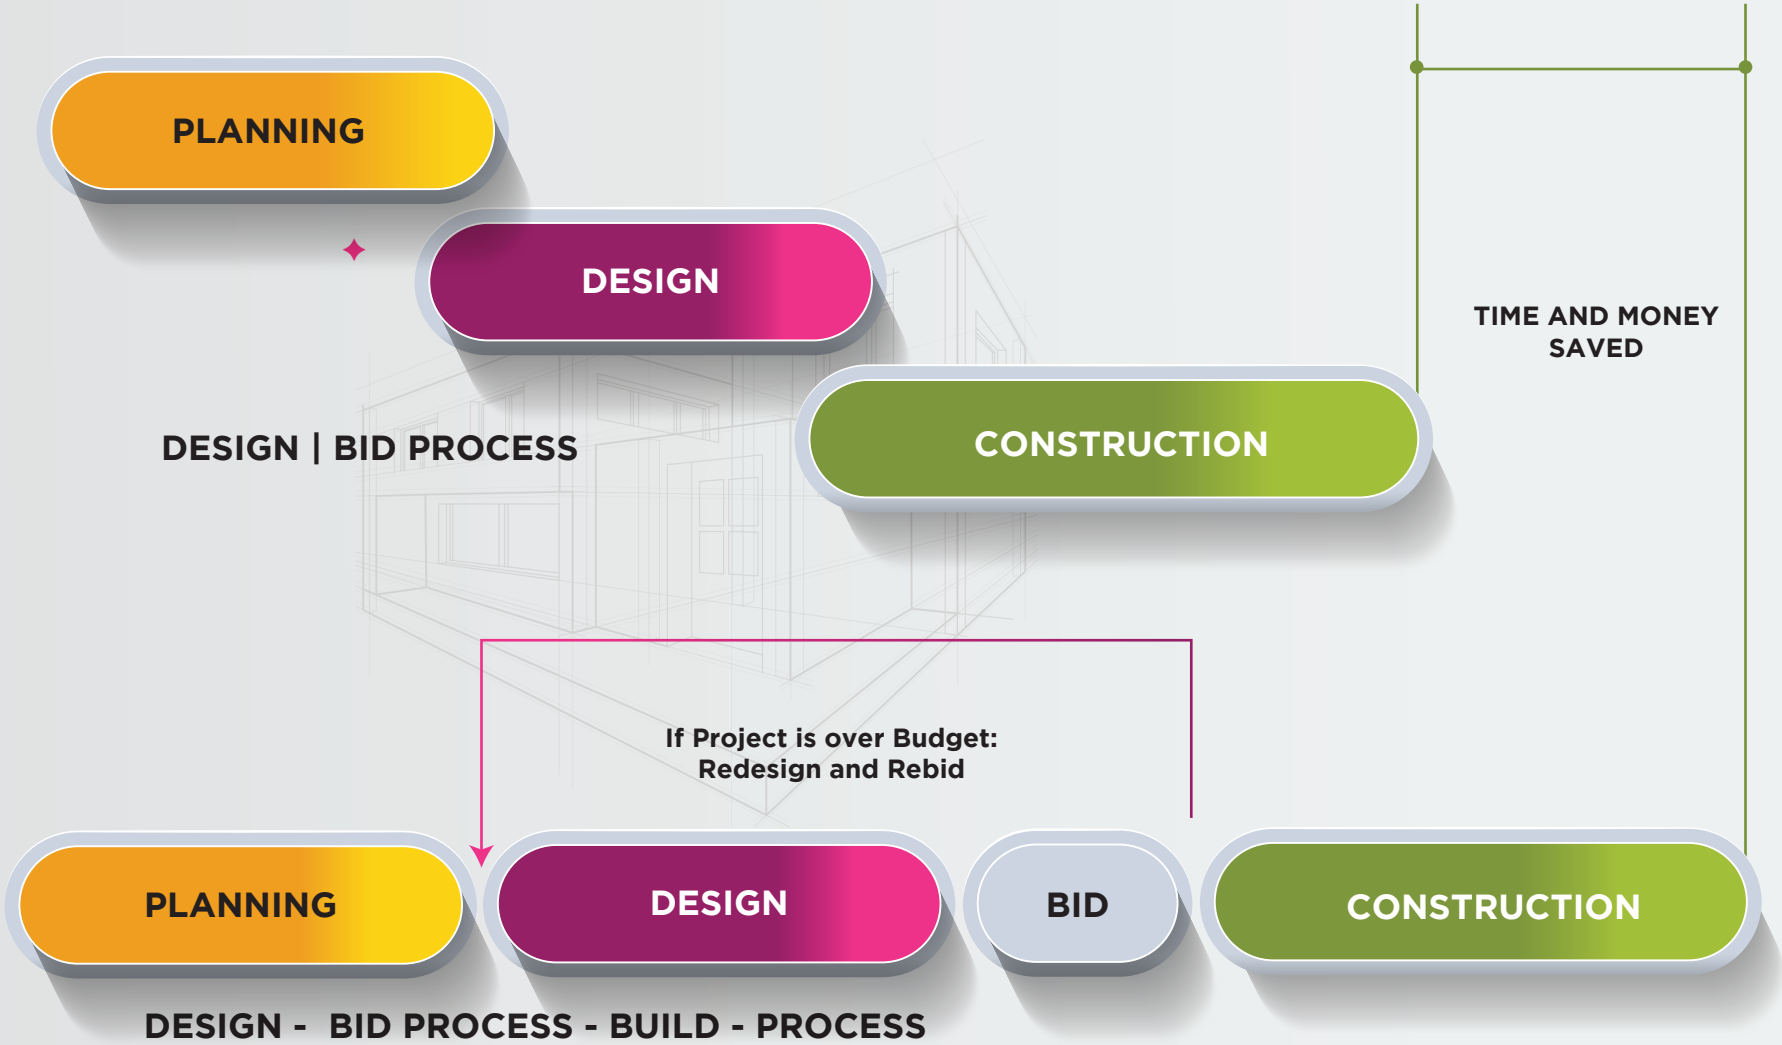

- Prepare structural feasibility report indicating the loading parameters and other important factors influencing the structural design.
- Finalize the method and programme for the construction of the structural framework of the building.
- Prepare structural outline based on the approved scheme drawings.
- Prepare preliminary estimate of cost of the structural items of work.
- Prepare drawings, typical design calculations and such other documents for submission to the local authorities.
- Prepare a statement of quantities of structural items of work to be included in the tender documents and present a rough estimate of cost.
- Water proofing treatment for podium, toilets and terraces.
- Infrastructural works for external development including RCC details for storm water, drain, cabling, water supply, compound wall etc.
- LV Telephone, Networking, Fire Alarm System, CCTV System, Access Control, Visitor Management System and PA System.

MEP SERVICES

- › Public Health Engineering
- › Electrical Services
- › LV Systems
- › Fire Protection and Fighting System based on NBC and Local Statutory Requirement
- › HVAC
- › IT Networking

HV Complete Electrical Solutions & Services, comprising of Transformers, Compact Substations, VCB, SFU bracer, RMU & LT Panels, Cabling, DG Sets, ATS, UPS Systems, Static Transfer Switches, Earthing, Internal & External Electrification
LV Telephone, Networking, Fire Alarm System, CCTV System, Access Control, Visitor Management System and PA System.
